TECHNOLOGY PARTNERS

Do you currently use Atlassian Tools ?

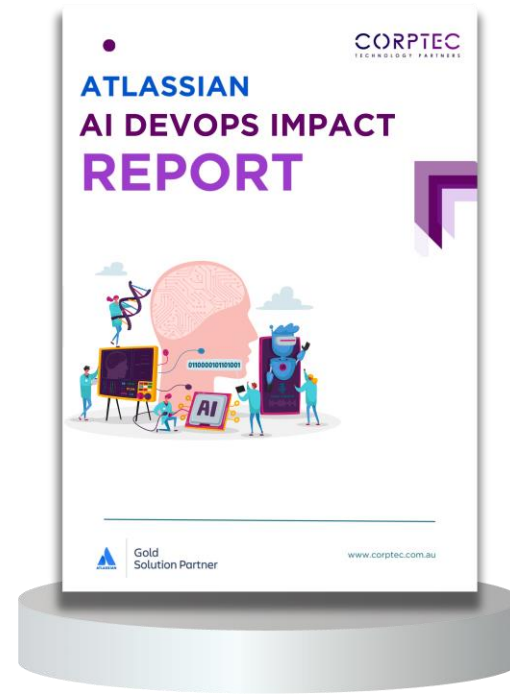

Get your comprehensive audits – At no cost (Yes ! It's 100% Free)

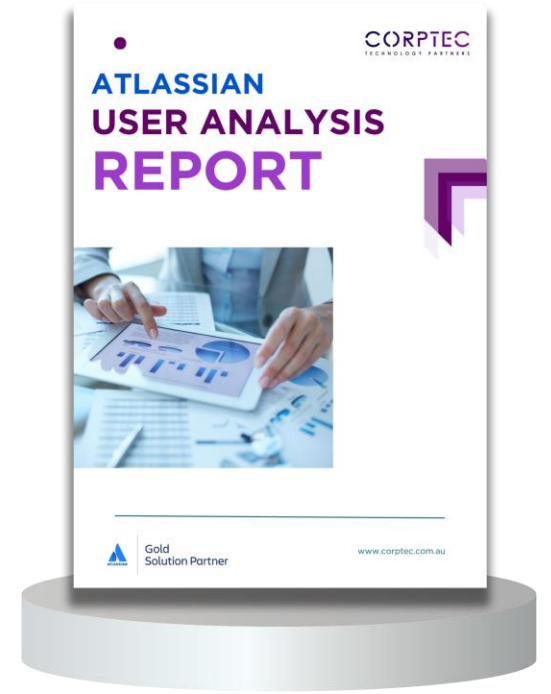

Are you wasting money on unused add-ons?

Keep your instance running at optimal performance

How will AI transform your DevOps tech stack?

Learn your user activities and streamline licenses

- Surface existing test cases and scenarios from process logs
- Generate custom AI recommendations and quantify gap analysis

- Business users can build tests without coding in a drag and drop interface
- Manage test data visually without spreadsheets

- Turn visual test cases into automated scripts with one click
- Designed for packaged apps to execute test without errors

- Comment on existing test cases and processes within the application
- Work with business users on test cases with errors via in app workflow

- AI suggestions on why test scripts had errors
- Heal with one click

- Clear descriptions of what will be impacted by an update before changes are pushed to production
